

B'NAI B'RITH BANNER

**CELEBRATING HANUKKAH
DECEMBER 8TH-16TH**

Hanukkah is to celebrate the miracle of the oil,
when 1 day's worth of oil miraculously
lasted for 8 days, allowing the eternal flame in
Jerusalem's Holy Temple to remain lit.

The traditional foods consumed during the
Hanukkah holiday are symbolic of the events
being celebrated. Most are fried in oil, symbolic
of the oil that lasted eight days. Others contain
cheese to celebrate Judith's victory.

B'NAI B'RITH BANNER

Resident Service Schedule @ B'nai B'rith

Congregate Brunch served on Sundays @ 11:00 am

Maryanne Webber, Nurse Practitioner will be here on Monday mornings

Ann Marie Bass, Activities Coordinator hours are Tuesdays from 9:00-2:00

Rabbi will be here on Wednesdays @ 1pm

Marnie Kean, Social Worker will be here Wednesday afternoons

Office Hours: Monday thru Thursday 9-5, Friday 9-4

"THE BALANCING ACT"

In 2008, an estimated 14.8% of American adults 65 years of age and older, which is approximately 33.4 million people, reported having either a balance or dizziness problem.

Having good balance means having control with walking, climbing stairs, getting up from a chair or bending over without falling.

Good balance is your independence to carry out activities of daily living with quality of life.

When people have balance issues it leads to falls and fall related injuries. According to the Center for Disease Control and Prevention roughly more than 1/3rd of adults 65 years and older fall each year because of the aforementioned problem which lead to their incapacitating injuries &/or deaths.

There are a myriad of reasons why balance may become a problem. It may be caused by an inner ear problem, medical problems; such as respiratory infection, viral infections, circulatory problems, stroke, low blood pressure, smoking, medications, to name a few.

Finding the correct diagnosis for a balance disorder is essential.

Questions you should ask yourself and then report the same to your Health Care Provider are as follows:

Do you feel unsteady?

Do you feel as if the room is spinning?

Do you feel you are moving when you know you are standing?

Do you feel as if you are falling?

Do you feel disoriented?

Did you remember to take your medications?

You can help your Health Care Professional make a definitive diagnosis by writing down answers to the following questions:

How would you describe your dizziness?

How often does your dizziness happen?

Have you ever fallen? When? Where? How?

Do you drink alcohol?

How much alcohol do you drink?

What health problems do you have?

Are your family members or friends concerned about these problems?

Based upon your answers your Health Care Provider can then make professional recommendations for treatment based upon his/her diagnosis.

Some recommendations might be strategies to help reduce the effects of a balance disorder such as exercise or refer you to a specialist if your problems are related to an inner ear problem, Multiple Sclerosis, Meniere's Disease, or medication problems

Whatever the cause you can protect yourself from getting a balance disorder by doing the following:

Diet and lifestyle changes can manage certain balance related problems such as Meniere's Disease.

Choose a low salt diet

Choose caffeine free beverages

Avoid alcohol which can make symptoms of vertigo less severe

Maintain a healthy weight

Exercise regularly – walking being the best exercise 20min daily increase by 5min weekly to tolerance Always check with your HCP

Fluid intake of water at least 6-7 cups minimum if not fluid restricted

Practice good body posture and movement

Avoid crossing legs when eating and/or sitting

In conclusion:

TAKE CONTROL

AVOID A FALL

PROTECT YOURSELF

APPRISE YOUR PCP

KEEP BALANCED
