

Bedbug Treatment

What should I do after the treatment is done?

1. Avoid entering room(s) for a minimum of 3-4 hours after treatment. Allow mattresses, box springs and other treated areas to dry before reassembling the room.
2. Avoid letting pets enter room(s) for a minimum of 3-4 hours after treatment. If anything is wet and could come in contact with animals do not let them re-enter until everything is dry.
3. Open windows if necessary to let air circulate properly.
4. Do not bring any infested furniture, mattresses, box springs and bed frames back into the home.
5. Encasing the pillows, mattresses and box springs is required.
6. Carefully inspect and vacuum-clean luggage when returning from trips and seal as well as throw away all garbage/garbage bags.
7. Infested electronic equipment must be discarded since no pesticide treatment is applicable.
